A current Rabies Vaccine is required for ALL Cats and Dogs. If you have a current Rabies Certificate for your pet from your Veterinarian, bring it with you and you will not be charged the \$20 Rabies Vaccine fee.

### IMPORTANT INFORMATION you need to know about using the SCHS SNAP Program

- Use of this program is based on your need for financial assistance. You are asked to provide your tax return from the last year, the last two pay stubs and proof of government assistance in order to establish your need for assistance. Any documents you provide to SCHS will be held in strict confidence and help with the application process.
- ALL FEES MUST BE PAID IN ADVANCE. Personal checks are not accepted, cash or credit is due at time of pickup for additional fees. If you do not show up for your appointment, you will forfeit the fees you paid. In the case of an emergency or situation at the shelter requiring it, we reserve the right to reschedule your appointment.
- You MUST drop off and pick up your pet at the times scheduled. Late fees and kenneling fees may be charged if you do not drop off and pick up your pet on time.
- Your pet must be licensed, as required by law. SCHS will help you with this process at an additional charge if your pet is not licensed
- NO other surgical services such as cat de-clawing, dog ear or tail docking will be done under the program, for any additional medical treatments please contact your veterinarian.
- All spays will have a small tattoo near incision to mark alternation
- For follow-up preventive care or for services other than spay/neuter, please contact your veterinarian.
- You must bring your cat to their appointment in a carrier. Dogs must be wearing a collar and be on a leash.
- Pet owners must supply all Vet records for their pet, including licensing information if current.
- Animals deemed to be an endangerment to the staff and volunteers of SCHS will not be considered for surgery.

# Did you know?

## 1 Male Cat + 1 Female Cat = 2,107 Cats in just 4 years!

If left unaltered, one male and one female cat with 2.8 surviving unaltered offspring will create:

1+1 = 12 cats 1 Year

7 cats in 2 Years

376 cats in 3 Years

2,107 cats in 4 Years

Each day 10,000 humans are born in the United States...and each day 70,000 puppies and kittens are born! As long as these birth rates exist, there will NEVER be enough homes for all the animals. As a result, millions of healthy, loving cats and dogs face untimely deaths as a form of pet animal population control. Others are left to fend for themselves, dumped and abandoned by cruel humans.

What can YOU do?

**SPAY or NEUTER  
YOUR PETS!**

- Cats can start mating as early as six months
- Even indoor-only house cats often find ways to get outdoors when the sexual urge hits them. Whether they disappear for good (due to panic, accidents, or enemies) or they return home, kittens are the result.
- An unaltered male cat can father hundreds of kittens a year.
- Statistically speaking, even if a person finds good homes for a litter of kittens, some of the kittens will grow up and produce more litters.
- Spaying a female before her first heat protects her from risks of uterine, ovarian, and mammary cancers.
- Spaying also protects her from the stresses of pregnancy.
- Spaying reduces her frantic interest in the outdoors and reduces the chances that she'll wander far.
- Spaying reduces the chances she'll mark your home with urine when she's in heat.
- Unaltered cats have urges that make them irritable and anxious. They yowl or whine frequently, fight with other cats, and/or destroy objects in the house.
- Neutering a male reduces his risk from numerous health problems.
- Neutering lowers his urge to roam and to fight, and thus lowers chances of disease transmission and injury.
- Neutering also reduces his tendency to spray in the home. And neutering eliminates the powerful odor of adult male cat urine.

Low Cost Spay and Neuter for pet owners in need of financial assistance is available through Sheboygan County Humane Society's
